Welcome Message

Dear colleagues and friends...

Abdominal trauma are common problems which need early and proper management from surgeon. The problem are vary from simple to complicated and need special intention to treat.

The committee organize two days seminar, to improve the knowledge on update management of abdominal trauma from basic science to clinical application include surgical or non surgical treatment, which relevant for digestive surgeon, general surgeon, general practitioner, digestive trainee, surgical resident and medical student. The symposium will be held on November 29th-30th, 2013.

For who interested in colonoscopy, further in house training for one month is possible, to improve the skill. It is so simple, so after attending this workshop the surgeon can do it by him/her self. This workshop will be held on Desember 1st, 2013.

See you in seminar and workshop

My best regards

Ignatius Riwanto
Chief of Digestive Surgery Division
Dept. Of Surgery, Diponegoro Medical Faculty
Dr. Kariadi Hospital
